Launching use case

Digitisation of EU cleaning documents (ECD) for tank trucks required prior to loading new cargoes

Neutral & secure data exchange through the **ECLIC** community on the NxtPort platform.

Through digital handshakes, data providers remain in full control of their data.

API first, but catering for all legacy data formats and protocols, ECLIC powered by NxtPort offers a low techical entry barrier for all stakeholders

INSTANT VALUE

Reduce cross contamination

Avoiding data re-entry

Create digital audit trails

Improve asset utilization

Reduce waiting times

Improve customer loyalty

Save 16 million sheets of paper per annum

HAPPENING NOW

Acceleration of further workflow digitization in chemical supply chain

From operational efficiency use cases to predictability and decarbonization

From intra-port logistics optimization to digital international trade lanes
